SELECTED PROJECTS

SmartStock - Inventory Management System

Django · DRF · PostgreSQL · Angular · Docker · GitHub Actions · Render | [Live demo](#) | [GitHub](#)

- Built and deployed a full-stack inventory platform with Django REST Framework, PostgreSQL and Angular.
- Implemented JWT authentication and role-based access control for Admin, Staff and Viewer users.
- Developed auditable inventory IN/OUT workflows, stock validation, analytics and low-stock alerts.
- Added filtering, search, ordering, pagination and OpenAPI documentation for the REST API.
- Containerized local development with Docker and automated backend/frontend CI with GitHub Actions.
- Production deployment includes database migrations, role/demo-user bootstrap and environment-based security configuration.

Apocalypsheep - Mobile RPG

Godot · GDScript · Modular architecture | [GitHub](#)

- Developed combat, loot, inventory, progression and persistence systems with decoupled game logic and UI.
- Organized development with GitHub Projects/Kanban and reusable domain-oriented components.
